

Dogness Smart Discover GPS Pet Tracker Reaches 2nd Most Popular Pet Tracker in China After Only 3 Weeks

DONGGUAN, China, Dec. 27, 2021 [/PRNewswire/](#) -- Dogness (International) Corporation ("Dogness" or the "Company") (NASDAQ: DOGZ), a developer and manufacturer of a comprehensive line of Dogness-branded, OEM and private label pet products, today announced its Discover Smart GPS Pet Tracker has become the 2nd most popular product in its category in China after only 3 weeks on the market.

Silong Chen, Chairman and Chief Executive Officer of Dogness, commented, "Our traditional and intelligent pet products have had successful launches in the past but nothing can compare to the success of our new state-of-the-art Discover Smart GPS Pet Tracker. Clearly, pet safety is as important to pet owners as it is to Dogness."

The Dogness Discover Smart GPS Pet Tracker is the next generation of smart pet tracking, boasting real-time positioning with long-range pin point accuracy, robust monitoring, extra-long battery standby time, and simple set-up and use. With strong demand following an initial rollout in China, the Company plans to expand availability into other key markets over the coming quarters, including North America, South America, Japan, Australia and Europe.

The user friendly, highly comfortable Dogness Discover Smart GPS Pet Tracker is a virtual leash that shares the pet's real-time location on its pet parents' smartphone through the Dogness smartphone app. The GPS tracker features a built-in 4G SIM card for high location accuracy and speed. The industry-standard Qi charger supports fast and easy wireless charging, and the high-capacity battery gives more than a week of operation per charge. Activity management functions allow pet parents to monitor the activity and health of their pets to help ensure pets get enough exercise throughout the day. A rapid, proactive alert provides immediate alerts if a pet leaves or returns to a user-defined virtual fence area, with historical traces to record where a pet has been.

Mr. Chen continued, "We are excited about the long-term sales potential for our Discover Smart GPS Tracker, which combines precise tracking accuracy, small size, light weight and long battery life. Our innovation and R&D efforts can give pet owners the confidence and security that comes with knowing where their pets are on a real-time basis with long range coverage. We believe our Discover Smart Tracker will serve as a centerpiece of our expanding line of enhanced pet IoT solutions."
